

REPUBLIC OF CYPRUS

VFR ROUTES AND TRAINING AREAS 01

SCALE : 1:250000

Positions are referred to World Geodetic System 1984 Datum.
Elevations and Altitudes are in feet above Mean Sea Level.
Bearings and Tracks are magnetic.
Distances are in Nautical miles.
Magnetic Variation : 04°00'E (2008)
Projection : UTM Zone 36 Northern Hemisphere.
Sources : The aeronautical data have been designed by the Department of Civil Aviation. The chart has been compiled by the Department of Lands and Surveys using sources available in the Geographic Database.

LEGEND

AERONAUTICAL FEATURES

- VFR route reporting points
- VFR Routes
- Minimum altitude quadrilaterals
2₁ = 2100 ft
- Navigational Aids
 - NDB
 - TACAN
 - VOR
 - VOR/DME
- Group of obstacles
- Obstacle
- Danger area (small extent)
- Danger/Restricted areas
- Training areas
- Control zones
- ATZ
- Aerodrome limits
- Heliports

BUILT ENVIRONMENT

- Built up area
- Motorway four lanes
- Asphalted roads
- Loose surface roads
- Transmission line

LANDMARKS

- Mines/Quarries
- Monastery
- Church
- Mosque
- Small fort

MARINE FEATURES

- Islets
- Rocks
- Wrecks
- Marine lights

HYDROLOGICAL FEATURES

- Water reservoir
- Salt lakes
- Dams
- Mines or Quarries
- Rivers and streams

TERRAIN

- Spot heights
- 0-500 ft
- 500-1000 ft
- 1000-1500 ft
- 1500-2000 ft
- 2000-2500 ft
- 2500-3000 ft
- 3000-3500 ft
- 3500-4000 ft
- 4000-4500 ft
- 4500-5000 ft
- 5000-5500 ft
- 5500-6000 ft
- 6000-max ft

BEARINGS AND TRACKS ARE MAGNETIC
ELEVATION AND ALTITUDES
ARE IN FEET ABOVE MSL
DISTANCES ARE IN NAUTICAL MILES
